

Monday, 25 August 2008 13:07

1. In your "MyBlog Editor" click on the "Tags" item from the right menu.
2. In the "Add a new tag" field, enter the tag you wish to create. The tag can be single or multiple words. When finished, click on the "Add" link. If the tag was created, a pop-up box will appear that says "Tag successfully created".
3. After creating the tag, we need to then assign the blog to that tag. Check on the appropriate tag checkboxes.
4. When finished with your post, hit either "Save" or "Save and Close".
